SPEED DRIVE

SP **SPEED DRIVE** allows the open end to quickly ratchet fasteners without removing the spanner from the fastener. This design results in much faster bolt and nut removal where only an open end spanner can be used.

SP Tools patented **GEAR DRIVE** spanners are precisely machined with deeper gears for greater torque loading and reliability with 72 teeth that only require 5° of space per turn.

The ratchet head allows the spanner to travel without having the need to remove the spanner from the fastener.

GEAR DRIVE DOUBLE RING

15° OFFSET DOUBLE GEAR DRIVE RING SPANNER SETS

- Dual reversible **GEAR DRIVE** ends
- **FLAT DRIVE TECHNOLOGY** - The flat drive ring end design allows for maximum contact between the tool and fastener. The extra contact means the applied torque can be increased and risk of damage to the fastener is decreased.

INVERTER GENERATORS SOUND LEVEL

Ideal for all camping & leisure activities, compared to similar products, the SPGi3300E is a powerful super quiet inverter generator with the best power, size to weight ratio on the market. Built around the reliable Torini race tested 7Hp engine and intelligent power supply, it is well suited for recreational use with air conditioners, refrigerators, microwave ovens, coffee machines & entertainment appliances. The microprocessor controlled inverter produces a high precision, pure sine wave power output, perfect for laptops, computers, mobile phones & tablets making it ideal for back up power at home during power outages & storm emergencies. Don't risk your electronic devices on anything less.

INVERTER GENERATOR FEATURES:

- Torini 4 Stroke Engine
- 3 in 1 Multi-function Control
- Engine Smart Control (ESC)
- 32 bit Inverter Core
- 12 Volt Outlet
- Low Running Noise: Max 65dB
- Parallel Connection Capable

CHECK OUT WHAT SOME OF OUR CUSTOMERS HAVE TO SAY ABOUT THEIR SP CORDLESS TOOLS

"IT'S A BLOODY TOUGH LITTLE THING THAT'S WORKED IT'S GUTS OUT."

TESTIMONIAL

"Thought I'd share the story of my one. I bought it approximately 18 months ago from our local 'SP truck' that visits our work (I'm a diesel mechanic apprentice). About 6 months into owning it, a co worker accidentally knocked it off the top platform of a caterpillar 793C dump truck. It fell to the ground but instead of it hitting the concrete of the work shop floor, it landed in a shallow but approximately 100 litre tray of old hydraulic oil. It sat in there fully submerged for no less than 5 minutes before I was alerted to it. I spent the next half an hour or so trying to dry it out and hoping it would work again. After a lot of cleaning, it eventually started working (although down on power) but it shot lots of sparks and smoke from the vents.

It's now been a year since that incident and I have used it every day (I bring it home on weekends for project car work) and it has not missed a beat other than being down on power compared to a few co workers 3/8 rattle guns of the same model.

Anyway, thought I'd let you guys know it's a bloody tough little thing that's worked it's guts out."
