ULTRA-CAPACITOR JUMP STARTER

RELIABILITY WHEN YOU NEED IT

- ALWAYS READY FOR USE WHEN YOU NEED IT
- CAPACITORS CAN FULLY CHARGE IN 45 SECONDS*
- DISPLAYS BATTERY VOLTAGE AND CONDITION
- ACCEPTS POWER INPUT FROM MULTIPLE SOURCES

This premium, next generation jump starter utilises ultra-capacitor technology and allows a vehicles flat battery (provided it still has more than 5 volts available) to charge the jump starters capacitors and then jump start the vehicle.

Simply connect the ultra-capacitor jump starter to the vehicle's battery, the jump starter will display the existing voltage and health status of the vehicle's battery and if necessary, will then charge itself from the depleted vehicle battery (or if available from any other vehicles battery), once charged the Jump Starter is then able to supply a short burst of full power back into the vehicles electrical system, allowing for vehicle start up.
