START YOUR CAREER WITH THE RIGHT GEAR

With the fast and ever changing tool requirements for today's modern vehicles and machinery, SP TOOLS have developed in conjunction with many of the major car manufacturers, a range of tool boxes and tool kits to meet the demands and requirements of the industries apprentices, technicians and mechanics.

TECH SERIES METRIC ONLY TOOL KITS

The requirements for the tools needed have been reverse engineered by listing all fasteners used in vehicle manufacture and incorporating the tools in the kits needed to service these vehicles.

Most vehicle manufacturers use only metric components so the decision to design these kits as metric only was easy and logical.

TECH SERIES TOOL BOXES & ROLL CABS

The Tech Series workshop boxes have been designed to not only store your tools but to stand up to the rigors of constant use and in many cases mobility. All the boxes are designed with a dog bone style frame construction offering maximum rigidity for the high volume and weight of the tools. Heavy gauge steel is used for all load bearing framework.

The Tech Series boxes are equipped with heavy duty ball bearing slides with extra slides for load bearing on the deeper drawers, dual gas struts stays on the top box lids and soft close drawers fitted with SP's Clicklock to secure the drawers when closed or when moving the box.

All the drawers are heavy load bearing and are full extension capable allowing you easy access to your tools. There are three external side storage compartments (great for aerosol cans etc) two on the top box and one on the roll cab. The roller cabinet also has a paper towel holder and a large removable side storage/rubbish bin. The larger top box to suit the wide roll cab and all roller cabinets are fitted with stainless steel work area tops and blow moulded side trays with holders for screwdrivers and bit and pieces.

All the boxes have moulded corner bumpers for protection against damage and are double powder coated. With the increased load from the many extra tools required in today's tools kits all the Tech Series roller cabinets are fitted with extra heavy duty castors, two fixed castors and two lockable swivel castors for easy manoeuvrability.

The boxes are white with black trim and draw fronts with a choice of either red or blue anodized drawer handles. All boxes are fully lockable with 2 keys for each lock.

The range of kits designed by SP TOOLS here in Australia are all professional technician kits to suit Starter Kits, Trade Kits and Master Technician Kits.

IT'S IN OUR BLOOD

A 25 YEAR RACE HERITAGE BORN & BRED IN THE SUPERCARS PIT LANE

For over 30 years SP AIR have been supplying and servicing Australia's automotive and industrial industries with quality air tools from our mini 1/4" Dr ratchet wrench right up to our pit lane proven impact wrenches.

With a huge range of impact wrenches, ratchet wrenches, die grinders, drills, air hammers, sanders, needle guns, air saws, riveters and more. All backed by a nation wide network of dealers and service agents.

The advantages of air tools is they are lighter, smaller, run cooler, safer and in general cost less to buy than power tools. SP air tools with the correct care and maintenance, oil daily and clean air, will far outlast power tools.

For reliability and performance, invest in the best - SP AIR TOOLS.

12 VOLT

This range is widely used in the automotive industries where size is important due to inaccessibility on today's vehicles and machinery. As most of the jobs are not repetitious, usually one battery will last the whole workday, so many of SP MAX DRIVE's 12V models are available with one or two batteries.

TRUSTED QUALITY TOOLS

With a heritage forged over decades of innovation in the tooling industry, SP Tools is proud to showcase the new premium SP MAX DRIVE power tool program, developed to offer superior performance to automotive, industrial and trade applications.

Each SP MAX DRIVE tool offers the best componentry for longevity and durability for the life of the tool and are rated in real working torque for real performance with optimal size, weight and comfort.

CHANGING MARKET DEMANDS

Today's requirements for productivity and useability have seen a major swing away from corded electric tools and air tools.

Tradesmen want and need their cordless tools to be smaller, lighter and more powerful but above all they have to be reliable.

SP Cordless have always had an envious reputation for longevity within the auto industry and the new SP MAX DRIVE range will exceed expectations.

The challenge has always been to have the batteries that not only have the required power output but can give a good runtime.

SP MAX LITHIUM Batteries are at the cutting edge of todays battery technology.

MAX CORE MICROPROCESSORS

The core to the SP Max Drive program are the Max Core microprocessors that offer the ultimate charger to battery to tool interface to improve outright performance. We have embedded microprocessors in all three components to give users longer run times, charge and discharge protection, intelligent current flow and temperature protection.

With SP Max Drive using Max Core technology, we can offer more work time, more power, more recharges and ultimately better performing tools.

SP MAX LITHIUM BATTERIES

The SP Max drive cordless range is powered by next-gen INR chemistry battery cells. The INR chemistry combines the safety and low resistance of Manganese and the high energy capacity of Nickel. When we combine these cells with Max Core electronics, the result is a battery pack with superior performance and safety or in simple terms, the very best available.

SOCKETS & ACCESSORIES

SP TRUSTED QUALITY

All SP Tools sockets and accessories are manufactured from high grade chrome vanadium steel and exceed international DIN and ANSI standards. Designed to withstand the rigors of industrial and trade use.

FLAT DRIVE TECHNOLOGY

Maximises contact on the flat sides of the bolt or nut, not the points.

QUALITY GEAR RATCHETS

All SP Gear Ratchets feature specially strengthened ratchet gear teeth to sustain maximum applied torque with quick release and cushion grip comfort handles.

LIFETIME WARRANTY

DIAGNOSTIC/ELECTRICAL

DIGITAL AUTOMOTIVE MULTIMETER

- RPM measurement for 2-10 cylinder automotive engines using the inductive pick-up
- Oversized high contrast 9999 count LCD display with backlight
- 14 functions including DC/AC voltage, DC/AC current (max 20A), resistance, RPM (tach), dwell angle, duty cycle frequency, MS-pulse, temperature (°C/°F), capacitance, continuity & diode check
- Read pulse duty cycle & dwell angle for electronic fuel injection feedback carburetors and ignition
- Fused current inputs & overload protection on all ranges
- Measure milliseconds pulse width to test on-time of fuel injectors, idle air control motors & electronic transmission controls
- Data hold and relative functions
- Auto power off, Auto ranging
- Back light

KIT INCLUDES:
Test Leads, K-type
Temperature
Probe, Inductive
Pick-up, 9v Battery
& Canvas Bag

CAN OBDII/EOBD/JOBD SCANNER CODE READER

Reads and clears generic & manufacturer specific diagnostic trouble codes (DTC's) & turns off check engine light.

- Works with all 1996 and newer vehicles that are JOBD/OBDII/EOBD compliant (including the CAN, J1850 PWM, J1850 VPW, ISO9141 and KWP2000 protocols).
- Compliant with OBDII 16 PIN Toyota, Honda, Daihatsu, Mitsubishi, Mazda, Nissan, Suzuki & Subaru
- Wider vehicle coverage with CAN protocol support.
- Supports multiple trouble code requests: Generic codes, pending codes and manufacturer specific codes.
- Code definitions are displayed on unit screen.
- Reviews the emission readiness status of OBDII Monitors.
- Determines malfunction indicator lamp (MIL) status.
- Retrieves VIN (Vehicle Identification No.) on 2002 and newer vehicles that supports Mode 9.
- Reviews the live data on unit screen.
- Review live data graph with four items in one screen.
- Stand-alone unit with no need for an additional laptop or computer to operate.
- Small in size and comfortably fits in the palm of your hand.
- Unit updates via internet by USB cable.
- Software CD with over 10,000 DTC definitions included.
- No batteries needed as the unit is powered via OBD2 cable.
- 2.8" TFT color screen displays more information on screen.

AUSTRALIAN APPRENTICESHIP TRADE SUPPORT LOAN

YOU COULD BE ELIGIBLE FOR AN AUSTRALIAN GOVERNMENT FUNDED TRADE SUPPORT LOAN

Trade Support Loans are loans paid in installments totaling up to \$20,808 over the life of an Australian Apprenticeship. These loans are intended to assist apprentices with everyday costs while they complete their apprenticeship. Eligible trade Australian Apprentices may apply (opt-in) for regular installments according to their needs.

HOW DOES IT WORK?

Eligible apprentices can apply for loans totaling up to \$20,808 over the life of an apprenticeship. Apprentices will opt in for six monthly periods with loan payments paid monthly in arrears. The amount an apprentice is eligible to receive as a Trade Support Loan is determined by the year of their apprenticeship, that is, whether they are a first, second, third or fourth year apprentice.

Apprentices who successfully complete their apprenticeship will receive a **20% discount** on their loan amount. The loan is repayable through the taxation system whenever and for as long as the loan recipient earns above the income repayment threshold (\$51,957 for 2018-19)

For more information, please visit: www.australianapprenticeships.gov.au/trade-support-loans

LOAN UP TO \$20,808

YEAR 1: up to \$8,323
YEAR 2: up to \$6,242

YEAR 3: up to \$4,162
YEAR 4: up to \$2,081
